# Android: Outlook for Android (IMAP)
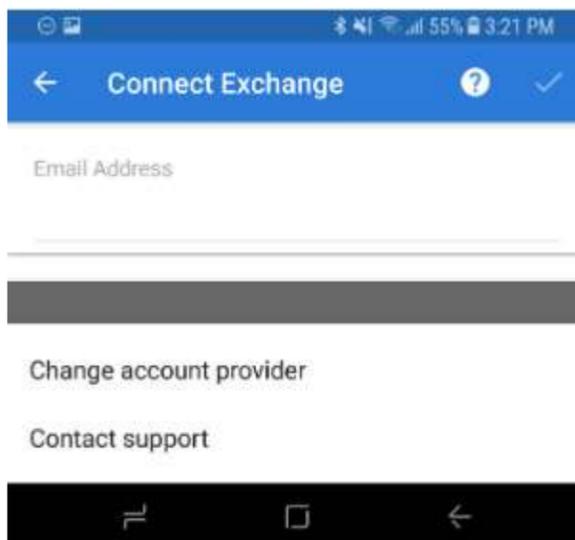

1. Download the Outlook for Android app from the Play Store here

2. Once it downloads, open it, and tap the blue **Get Started** button

3. Enter your email address: **your_email_here@uplogon.com**

4. Tap **Continue**

5. Now, the app by default will choose Exchange. Tap on the white Question Mark icon on the top left

6. Then tap **Change account provider**

7. Select **IMAP**, at the bottom

8. Enable the **Advanced Settings** slider

9. Enter the following settings on the screen, as shown below:

    Email: your_email_here@uplogon.com
    Display Name: Your name
    Description: something to help you distinguish the account

    IMAP Incoming Server: secure.emailsrvr.com
    Username: your_email_here@uplogon.com
    Password: Your mailbox password

    SMTP Outgoing Server: secure.emailsrvr.com
    Username: your_email_here@uplogon.com
   **Password:** Your mailbox password

    Once you're done, click the checkbox on the top right corner

10. Tap **Skip** to skip adding another account

11. You may go through the app tutorial by clicking on the arrow on the bottom right, or tap **Skip** to skip it
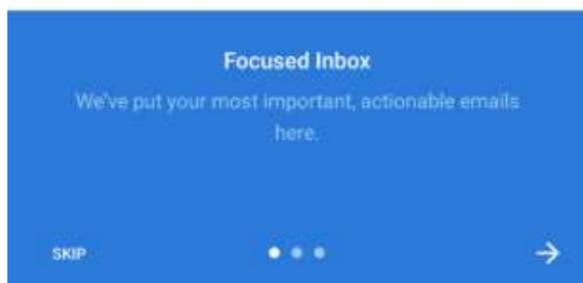

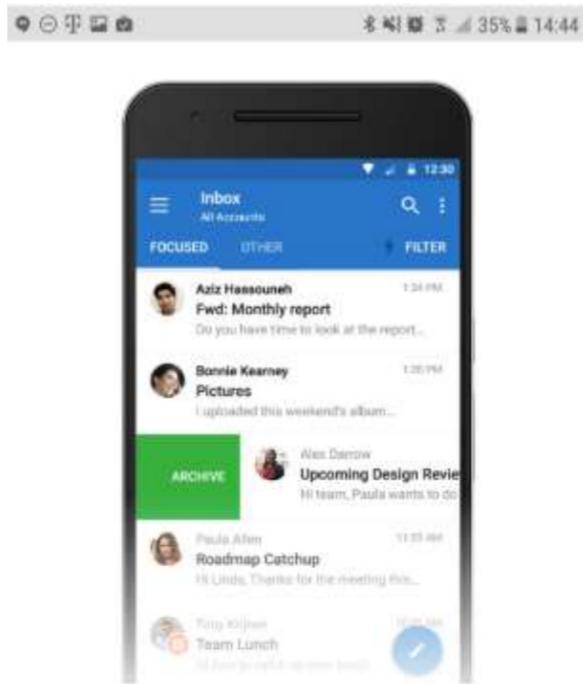

12. Once you see the mailbox screen, you are all set! It may take a few minutes to download mail depending on a variety of factors
